INFORMATION DISCLOSURE STATEMENT

Sir:

This is an Information Disclosure Statement filed in accordance with 37 CFR 1.98.

Attached is a Form PTO/SB/08 identifying each of the seven (7) references cited in the International Search Report issued by the European Patent Office on March 18, 2004 in connection with the above-identified International Application. As can be seen from the enclosed copy of that Search Report, two of the cited references are indicated as being in Category Y, while the remaining references are cited as defining the general state of the art but not of particular relevance, i.e., Category A.

No copy of any of the identified references cited in the International Search Report is enclosed since copies are presumed to already be in the file due to having been forwarded by the European Patent Office as a result of an existing treaty. However, if no such copies of the references are in the file and a copy of one or both of these references is desired,

10/537769
JC17 Rec'd PCT/PTO 06 JUN 2005

please request a copy of the desired reference from undersigned counsel and it will be supplied.

Attached Form PTO/SB/08 also identifies two references cited and discussed with regard to their relevance on pages 1 and 2 of the present application. Copies of these two references are attached.

Finally, attached Form PTO/SB/08 also identifies three German references cited in an Office Action dated May 23, 2004 issued by the German Patent Office in connection with the counterpart German Patent Application, the rights of priority of which are claimed for the present application. A copy of the Office Action and a copy of each of these three German references are attached. While no English translation of any of these three references or of the Office Action is presently readily available, English language Abstracts are provided for each of these three German references. Moreover, it is noted that German references DE10107583 and DE10046631 correspond to US Patent Number 6,534,992 and US Published Patent Application Number 2004021448, respectively, and these US patent publications are likewise identified in the attached Form PTO/SB/08.

Since all requirements for the filing of Information Disclosure Statements have been complied with, it is requested that the Examiner consider all of the identified references and indicate such consideration by enclosing a properly initialed copy of the enclosed Form PTO/SB/08 with the initial Office Action.

Respectfully submitted,

FITCH, EVEN, TABIN & FLANNERY
